**Amendments to the Specification**

Please replace paragraph [0008] with the following amended paragraph:

[0008] In order to achieve the first object set out above, a locating device configured for measuring distances between dots of ~~an LGP~~ a light guide plate in accordance with the present invention comprises a sheet having a plurality of reference points marked thereon being configured for locating of the dots during measuring. A distribution density of the reference points is lower than a distribution of the dots.

Please replace paragraph [0009] with the following amended paragraph:

[0009] In order to achieve the second object set out above, a preferred method of the present invention for using a locating device ~~to measure for measuring~~ distances between dots of ~~an LGP~~ a light guide plate comprises the steps of: providing ~~a sheet~~ the locating device having a plurality of reference points marked thereon, the plurality of reference points being configured for locating of the dots, a distribution density of the reference points being lower than a distribution density of the dots; attaching the ~~sheet~~ locating device to a surface of the ~~LGP~~ light guide plate that is opposite to the dots; and gauging distances between the dots using a measuring instrument.
